Contrôle 1

This is an appropriate point to review and/or assess progress and the activities on pages 39–42 of Talk French are designed for this purpose.

The following activities could be used for extension work:

- Activity 4 could lead to brainstorming of other places in France, reinforcing pronunciation/spelling and stimulating learners to contribute their personal experiences of France. It can bring a wealth of cultural information to the classroom and reinforce motivation.

- Activity 8 could be a model for learners to write a short description of themselves.

- Learners work in pairs or groups to produce their own mots cachés along the lines of Activity 9 for other groups to solve.
